## IN THE CLAIMS

Claims 1-46 (cancelled)

Claim 47 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising about 60 to about 98 weight percent of the blend, and polymer (A) comprising from about 92.7 to about 82.2 weight percent of units derived from propylene and from about 7.3 to about 17.8 weight percent of units derived from a comonomer selected from the group consisting of ethylene and an unsaturated monomer other than ethylene, and polymer (A) is further characterized as comprising crystallizable propylene sequences, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).

Claim 48 (previously presented): The article of Claim 47 in the form of a film.

Claim 49 (previously presented): The article of Claim 47 in which polymer (A) comprises about 75 to about 98 weight percent of the blend.

Claim 50 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising from about 60 to about 98 weight percent of the blend, and polymer (A) comprising from about 96 to about 65 weight percent of units derived from propylene and from about 4 to about 35 weight percent of units derived from a comonomer selected from the group consisting of ethylene and an unsaturated monomer other than ethylene, and polymer (A) is further characterized as comprising crystallizable propylene sequences, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).

Claim 51 (previously presented): The article of Claim 50 in the form of a film.

Claim 52 (previously presented): The article of Claim 50 in which polymer (A) comprises about 75 to about 98 weight percent of the blend.

Claim 53 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising about 30 to about 98 weight percent of the blend, and polymer (A) comprising a copolymer of about 95 to about 92 weight percent of propylene derived units and about 5 to about 8 weight percent of ethylene derived units, and polymer (A) is further characterized as comprising crystallizable propylene sequences and having a molecular weight distribution of from about 1.8 to about 4.5, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).

Claim 54 (previously presented): The article of Claim 53 in which polymer (A) comprises about 60 to about 98 weight percent of the blend.

Claim 55 (previously presented): The article of Claim 53 in which polymer (A) comprises about 75 to about 98 weight percent of the blend.

Claim 56 (previously presented): The article of Claim 53 in the form of a film.

Claim 57 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising about 30 to about 98 weight percent of the blend, and polymer (A) comprising a copolymer of about 95 to about 92 weight percent of propylene derived units and about 5 to about 8 weight percent of ethylene derived units, and polymer (A) is produced from a catalyst system comprising hafnium and further characterized as comprising crystallizable propylene sequences, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).

Claim 58 (previously presented): The article of Claim 57 wherein the catalyst system comprises a non-coordinating anion.

Claim 59 (previously presented): The article of Claim 57 wherein the catalyst system comprises a metallocene catalyst.

Claim 60 (previously presented): The article of Claim 57 in which polymer (A) comprises about 60 to about 98 weight percent of the blend.

Claim 61 (previously presented): The article of Claim 57 in which polymer (A) comprises about 75 to about 98 weight percent of the blend.

Claim 62 (previously presented): The article of Claim 57 in the form of a film.

Claims 63-69 (cancelled)

Claim 69 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising about 60 to about 98 weight percent of the blend, and polymer (A) comprising a copolymer of about 96 to about 65 weight percent of propylene derived units and about 4 to about 35 weight percent of ethylene derived units, and polymer (A) is further characterized as comprising crystallizable propylene sequences and having a molecular weight distribution of from about 1.8 to about 4.5, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).

Claim 70 (previously presented): The article of claim 69, wherein polymer (A) comprises about 9.4 weight percent of ethylene derived units.

Claim 71 (previously presented): The article of claim 69, wherein polymer (A) comprises about 11.6 weight percent of ethylene derived units.

Claim 72 (previously presented): The article of claim 69, wherein polymer (A) comprises about 12.8 weight percent of ethylene derived units.

Claim 73 (previously presented): The article of Claim 69 in which polymer (A) comprises about 75 to about 98 weight percent of the blend.

Claim 74 (previously presented): The article of Claim 69 in the form of a film.

Claim 75 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising about 60 to about 98 weight percent of the blend, and polymer (A) comprising a copolymer of about 92.7 to about 82.2 weight percent of propylene derived units and about 7.3 to about 17.8 weight percent of ethylene derived units, and polymer (A) is further characterized as comprising crystallizable propylene sequences and having a molecular weight distribution of from about 1.8 to about 4.5, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).

Claim 76 (previously presented): The article of claim 75, wherein polymer (A) comprises at least about 9.4 weight percent of ethylene derived units.

Claim 77 (previously presented): The article of claim 75, wherein polymer (A) comprises at least about 11.6 weight percent of ethylene derived units.

Claim 78 (previously presented): The article of claim 75, wherein polymer (A) comprises at least about 12.8 weight percent of ethylene derived units.

Claim 79 (previously presented): The article of Claim 75 in which polymer (A) comprises about 75 to about 98 weight percent of the blend.

Claim 80 (previously presented): The article of Claim 75 in the form of a film.

Claim 81 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising about 60 to about 98 weight percent of the blend, and polymer (A) comprising a copolymer of about 96 to about 65 weight percent of propylene derived units and about 4 to about 35 weight percent of ethylene derived units, and polymer (A) is produced from a catalyst system comprising hafnium and further characterized as comprising crystallizable propylene sequences, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).

Claim 82 (previously presented): The article of Claim 81 wherein the catalyst system comprises a non-coordinating anion.

Claim 83 (previously presented): The article of Claim 81 wherein the catalyst system comprises a metallocene catalyst.

Claim 84 (previously presented): The article of claim 81, wherein polymer (A) comprises about 9.4 weight percent of ethylene derived units.

Claim 85 (previously presented): The article of claim 81, wherein polymer (A) comprises about 11.6 weight percent of ethylene derived units.

Claim 86 (previously presented): The article of claim 81, wherein polymer (A) comprises about 12.8 weight percent of ethylene derived units.

Claim 87 (previously presented): The article of Claim 81 in which polymer (A) comprises about 75 to about 98 weight percent of the blend.

Claim 88 (previously presented): The article of Claim 81 in the form of a film.

Claim 89 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising about 60 to about 98 weight percent of the blend, and polymer (A) comprising a copolymer of about 92.7 to about 82.2 weight percent of propylene derived units and about 7.3 to about 17.8 weight percent of ethylene derived units, and polymer (A) is produced from a catalyst system comprising hafnium and further characterized as comprising crystallizable propylene sequences, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).

Claim 90 (previously presented): The article of Claim 89 wherein the catalyst system comprises a non-coordinating anion.

Claim 91 (previously presented): The article of Claim 89 wherein the catalyst system comprises a metallocene catalyst.

Claim 92 (previously presented): The article of claim 89, wherein polymer (A) comprises at least about 9.4 weight percent of ethylene derived units.

Claim 93 (previously presented): The article of claim 89, wherein polymer (A) comprises at least about 11.6 weight percent of ethylene derived units.

Claim 94 (previously presented): The article of claim 89, wherein polymer (A) comprises at least about 12.8 weight percent of ethylene derived units.

Claim 95 (previously presented): The article of Claim 89 in which polymer (A) comprises about 75 to about 98 weight percent of the blend.

Claim 96 (previously presented): The article of Claim 89 in the form of a film.

Claim 97 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising about 60 to about 98 weight percent of the blend, and polymer (A) comprising a copolymer of about 96 to about 65 weight percent of propylene derived units and about 4 to about 35 weight percent of ethylene derived units, and polymer (A) is further characterized as comprising crystallizable propylene sequences and having a narrow compositional distribution, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).

Claim 98 (previously presented): An article of manufacture made from a polymer blend comprising at least one polymer (A) and at least one polymer (B), polymer (A) comprising about 60 to about 98 weight percent of the blend, and polymer (A) comprising a copolymer of about 92.7 to about 82.2 weight percent of propylene derived units and about 7.3 to about 17.8 weight percent of ethylene derived units, and polymer (A) is further characterized as comprising crystallizable propylene sequences and having a narrow compositional distribution, and polymer (B) comprising an isotactic thermoplastic polymer other than polymer (A).
